Scientist to Review Updated Research Related to Peracetic Acid Exposure in Poultry Plants at the 2019 Poultry Processor Workshop

Tucker, Ga., May 1, 2019 – Scheduled for the upcoming 2019 Poultry Processor Workshop, updated research on exposures to peracetic acid-based antimicrobials among poultry processing workers will be reviewed by the scientist who has conducted the studies. Jenny Houlroyd will provide a first-hand account of the updated research, funded by USPOULTRY, that found considerable variation and lack of precision between tested methods related to exposure of peracetic acid. Be sure to attend and hear it first at this year’s 2019 Poultry Processor Workshop!

Attendees will have the opportunity to discuss the updated research findings first-hand with the scientist. The Workshop will be held May 22-23, at the DoubleTree by Hilton Downtown hotel in Nashville, Tennessee. Industry professionals in all capacities related to processing plant operations, food safety, quality assurance, maintenance and management can benefit from attending the Workshop.

To view the full agenda and register for the Poultry Processor Workshop, click here or visit www.uspoultry.org.

###

U.S. Poultry & Egg Association (USPOULTRY) is the all-feather organization representing the complete spectrum of today’s poultry industry, whose mission is to progressively serve member companies through research, education, communication and technical assistance. Founded in 1947, USPOULTRY is based in Tucker, Georgia.
