

PROGRAM INFORMATION

Feed manufacturing is one of the most important areas in poultry and egg production and processing. As feed mill management challenges get more complex from year to year, the costs continue to increase. USPOULTRY's 2024 Feed Mill Management Seminar is a valuable source for staying abreast of the latest technology and techniques to keep your mill running efficiently and effectively.

The program, developed by a committee of experienced mill managers, will address practical ideas to improve production and efficiency in poultry feed production. Topics will cover all milling functions from biosecurity and fire protection to feed manufacturing and delivery.

To prepare yourself and your mill for future success, register today! Don't delay!
